Max Lane Road Construction

The Town of Easton will be performing road construction on Max Lane from Calvert Street to Lomax Street beginning May 6, 2013. The purpose of the project is to repair /improve drainage by reconstructing the storm drain inlet and adding concrete curbing. The road surface and base will also be removed and reconstructed. The contractor for this project is David A. Bramble from Chestertown Maryland.

There will be daytime lane closures in immediate work areas and the contractor will be working to keep property owners accessible to their properties as much as possible as the job progresses. The Town of Easton has a very aggressive construction schedule for the project with a substantial completion date anticipated of Memorial Day 2013.

If you have any questions, or concerns please contact Brian Hause at 410-822-2525 ext. 138. We apologize for any inconvenience and thank you in advance for your cooperation while we work to improve the quality of our streets.
